

Software Test Drive

At Discount LED Display, our number one question from our customers is "How easy is it for me to program my LED display?" And the answer is always the same... Easy! Our user-friendly software is designed with the help of the very people who use it. And no other LED wholesaler offers it. With so many fail safes built into our software, you'll never be left in the lurch with a question about programming your new LED display from Discount LED Displays.

- Built in software wizards offer step-by-step guides to walk you through any task.
- User-friendly training manual
- Good old-fashioned human interaction with a help desk that's open six days a week.
- Customer support hours: Monday - Friday 9:00am to 6:00pm Central Time, Saturday 9:00am to 12:00pm.

Graphic:

- Easy Art library comes with hundreds of graphics options.
- Lets you preview images easily before they are displayed on your sign.
- Access to special images and video collections that are updated all the time.
- Our software package can continually convey the fresh thinking that makes your business or organization unique. Why our software sets Discount LED Displays apart from our competition:

- Edit, schedule and update from just one program.
- Preview graphics before you send them to the sign.
- Use images from our Easy Art library with special collections being added all the time.
- So intuitive and easy to use with our software wizards, you and your sign will be up to speed in no time.
- Software training is always available over the phone, just schedule a phone call from one of our friendly tech support representative.

- Connect to your new Discount LED Display sign through several communication options to fit everyone needs:

Broadband wireless, RF(Radio Frequency) wireless, Phone modem, Fiber optic, Local Area Network(LAN) and Wide Area Network(WAN). To schedule a Software Test Drive, contact us at 866-756-1375 or fill out one of our Request Forms.
